

To those who run the FCC,

I am a very satisfied customer of satellite radio. I listen to all of the music that I love at any time I want to hear it. I am the consumer and with satellite radio I make requests and the music I want is played. I listen to the news on my satellite radio. There are great stations. I am strongly urging you to reject the the NAB's petition 04-160. I will fight for my right to buy a service and enjoy it when I choose. Please do not take my right to listen to what I want to away.

Thank You,
Adallie Penate
